.NET backend developer with frontend experience and a full-stack direction

10 years in enterprise software development
C#, .NET, SQL, REST APIs and integrations

PROFILE

Backend developer focused on C#, .NET, SQL, web services and REST APIs. Previous frontend experience with SharePoint, JavaScript, jQuery, HTML and CSS. Currently strengthening Angular and TypeScript knowledge to grow towards a full-stack profile while keeping backend development as my main specialisation.

EXPERIENCE

Avanade · Software development and technical coordination
Internship · January-June 2016 | Employee · July 2016-present

Insurance sector · Backend and platform evolution
C#, .NET Framework up to 4.8, SQL, Nintex K2 blackpearl / K2 Five, Postman and Git. Backend development, maintenance, enhancements, migrations, testing and adaptation of owned components during the base product evolution, coordinating with Nintex as product provider.

Primary technical lead
Estimation, task organisation, priorities, support and mentoring, client and vendor communication, incident follow-up and hands-on development. Coordinated teams of 3 to 6 people.

Critical production incident
Coordinated the technical team and client communication, led data recovery and helped restore normal operations with limited final impact.

Logistics sector · Backend development
.NET Core, SQL and Angular. Mainly backend development with small frontend enhancements and maintenance.

SharePoint and frontend
First 4-5 years working with SharePoint, JavaScript, jQuery, HTML and CSS.

HIGHLIGHTED PROJECT

Android Expense Tracker Demo
Personal Kotlin expense-tracking demo built with Jetpack Compose and Room. Monthly dashboard, movements, summaries, categories and forms. Wholly fictional demonstration data.

github.com/jCabreraMartin/android-expense-tracker-demo

SKILLS

Backend and data
C# · .NET Framework · .NET Core · SQL · REST APIs and web services · Integrations · Nintex K2

Frontend
JavaScript · HTML · CSS · jQuery · SharePoint · Angular and TypeScript (initial knowledge, currently strengthening)

Tools
Git · Postman · GitHub Copilot · OpenAI Codex

Professional capabilities
Problem solving · Critical incident response · Technical estimation · Team coordination · Client and vendor communication

EDUCATION

Technical Engineering in Computer Systems
University of Malaga (UMA)

Microsoft Certified: Azure Fundamentals
AZ-900 · Obtained on 12 June 2024

English
B1 level

AI-ASSISTED DEVELOPMENT

I use GitHub Copilot and OpenAI Codex to support code generation, refactoring and review, debugging, documentation, testing, technical research and learning, always with human technical validation.

DIRECTION

Interested in continuing to grow as a software developer, bringing backend .NET experience and progressively expanding frontend scope.
